

Using Schlage for  
time and attendance is  
hands down – a  
better solution.

© 2015 Allegion

Our HandPunch terminals utilize the hand's unique shape and size to verify an employee's identity every time they punch in – all in less than a second. Unlike fingerprint readers, performance is not affected by dirt, dust, or smudges.

We offer one of the most effective solutions for workforce management. Hands down.
